**PROMO
ERA3**

**ORION: secure solutions upgrading your
transponder service**

OPERATIVE MODE 1

Original Key + ORION SNOOP programming mode

	<p>1) Insert the original key into ERA3. ERA3 asks for the SNOOP. Insert the SNOOP. ERA3 resets the SNOOP.</p>
	<p>2) DETECTING Data Insert the snoop into the customer's car key. Turn the key once into the ignition and the led 1 lights up; turn the key a second time and the led 2 will also light up.</p>
	<p>3) DOWNLOADING DATA Insert the SNOOP into the ERA3, which will read the detected data.</p>
	<p>4) Insert the original key in the ERA3 and the device will elaborate the secret code.</p>
	<p>5) Insert the blank EHP and ERA3 will write it.</p>
	<p>6) Cut the blade.</p>

OPERATIVE MODE 2

Original Key + SNOOP with already detected data

	<p>1) Insert the original key into ERA3 for identification. ERA3 asks for the SNOOP.</p>
	<p>2) Insert the SNOOP: ERA3 recognizes the detected data for the original key and saves it.</p>
	<p>3) Insert the original key a second time and the ERA3 elaborates the secret code.</p>
	<p>4) Insert the blank EHP and the ERA3 will write it.</p>
	<p>5) Cut the blade.</p>

OPERATIVE MODE 3

Programmed EHP available

SNOOP not needed – go directly to the duplication

	<p>1) Insert the programmed EHP key and the ERA3 will elaborate the secret code.</p>
	<p>2) Insert a new blank EHP and write it. ®</p>
	<p>3) Cut the blade.</p>
