* Ces systèmes nécessitent une mise à jour logiciel spécial pour les Systèmes Kaba - Code: D742633ZB (Triax Program) - D742632ZB (Quattrocode Program).

NOTA IMPORTANTE: Los sistemas estarán disponibles solo en SKP (NO stand alone). Algunos de estos sistemas necesitan una password comunicada por Kaba y algunos sistemas en Triax Quattro necesitan mordazas R13 y fresas específicas. Triax e.code no duplica sistemas cilindro Kaba.

* Estos sistemas necesitan una especial actualización de software para Sistemas Kaba - Código: D742633ZB (en Triax Program) - D742632ZB (en Quattrocode Program).

NOTA IMPORTANTE: Os sistemas estarão disponíveis somente no SKP (não no modo stand alone). Alguns destes sistemas requerem um password a ser liberada por Kaba e alguns sistemas na Triax Quattro precisam do mordente R13 e fresas especiais. Triax e.code não pode duplicar as chaves para os sistemas de cilindros Kaba.

Security Essen / Essen Fair, Germany

23-26 September 2014

Silca attended the 40th edition of the Security Essen fair, the world's leading exhibition for security and fire prevention, introducing innovative product solutions. These were the highlights.

AIR₄ RESIDENTIAL REMOTES

Silca's new line of residential remotes Air₄, suitable for barriers, garage doors and automated gates, was launched, garnering great interest from Silca customers and the attendees of the fair.

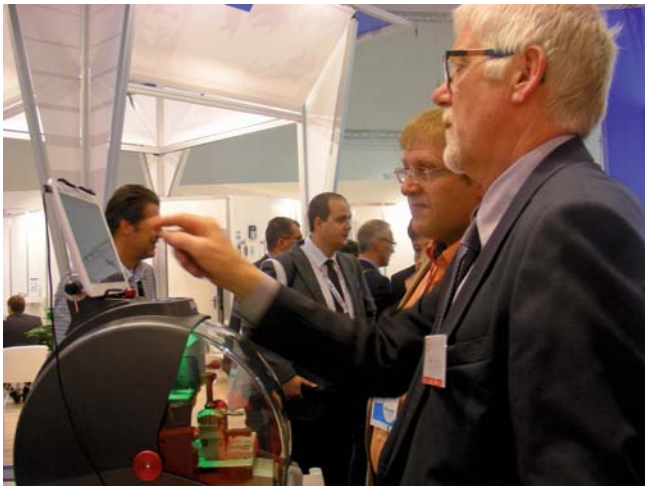

Able to store four different remotes in one device, Air₄ covers the most extensive range of remotes on the European market. Ergonomic, long-lasting and functional, it is set to meet the needs of both Silca partners and final customers. The first will benefit from its simple programming procedures, while the latter will appreciate its smart design, anatomical shape and splash-proof technology.

All the machines and devices exhibited at the stand were tried out first hand by customers and visitors interested in seeing how they work.

FUTURA AND FUTURA ONE

Futura keeps drawing the attention of specialists operating in the key cutting business. The unrivalled success of the latest tablet-integrated electronic key cutting machine from Silca at the Essen Security fair, where it played a leading role, is testament to that.

Building up on the successful launch of Futura less than a year ago, Silca presented as world premiere Futura One. Due to make its debut at the beginning of 2015, the new electronic machine is characterized by a single cutting station for laser and dimple keys: a customized solution to meet the needs of demanding and money-savvy customers.

PROFESSIONAL REVIEW OF FUTURA

“ Ilico has introduced the Silca branded “Futura” to their collection of fine key machines. Its innovative design and advanced electronics place it at the forefront of new key machine design. [...] capable of producing edge cut, laser cut, dimple, cruciform, tubular and Tibbe style keys, it is 12 machines (6 duplicators and 6 code cutters) in one amazingly small footprint. A first of its kind. ”

Robert Sieveking - The National Locksmith, Oct. 2014

PROTECH PLUS

ProTech Plus, the new highly performing semi-industrial machine for cutting, engraving and sorting different types of keys, ensures increased performances by 30% compared with the previous model, ProTech, guaranteeing the same flexibility and precision of results (up to +/- 0.03 mm tolerances). Silca has also engineered a special model of ProTech to cut Abloy® keys, the first worldwide semi-industrial cutting machine for this type of systems.
