ATTENTION:

● A **new R30 clamp** that can house Triax Pro and Futura removable jaws has been introduced for the Quattrocode and Triax-e.code key-cutting machines. The R30 clamp is necessary only for the new lock systems developed by Silca with new jaws. All existing options for Quattrocode and Triax-e.code will not be replaced by removable jaws for the R30 clamp.

A R30 clamp that can house Triax Pro removable jaws has been introduced for the Triax Quattro key-cutting machine. All lock systems developed on the removable jaws of Triax Pro can also be used with the R30 clamp on the Triax Quattro.

To use the R30 clamp with the Triax-e.code, Triax 2 and Triax Quattro key-cutting machines, replace the U102TT and U103TT tracers on the Tracer Tower with a single O4TT tracer. The necessary instructions are included in the box of the optional R30 clamp (D746897ZB).

Triax Pro: all lock systems that can be used with the standard R29-01J-02J clamp have been implemented.

Triax-e.code and Triax 2: the machine memory is full.

This update implements all the lock systems already available on the Quattrocode, Triax Quattro and Triax Pro key-cutting machines. These systems and the new ones to be developed by Silca will be included **only** in Silca Key Programs and not incorporated into the machines. Therefore, Silca Key Programs is necessary to use the new systems with the Triax-e.code and Triax 2 key-cutting machines.

ATTENZIONE:

● Per le duplicatrici Quattrocode e Triax-e.code è stato introdotto il **nuovo morsetto R30** che può alloggiare le ganasce rimovibili di Triax Pro e Futura. Solo per i nuovi sistemi serratura sviluppati da Silca con nuove ganasce sarà necessario utilizzare il morsetto R30. Tutti gli opzionali esistenti per Quattrocode e Triax-e.code non saranno sostituiti da ganasce rimovibili per il morsetto R30.

● Per la duplicatrice Triax Quattro è stato introdotto il nuovo morsetto R30 che può alloggiare le ganasce rimovibili di Triax Pro. Tutti i sistemi serratura sviluppati in Triax Pro sulle ganasce rimovibili sono utilizzabili anche con il morsetto R30 sulla macchina Triax Quattro.

● Per utilizzare il morsetto R30 con le duplicatrici Triax-e.code, Triax 2 e Triax Quattro, è necessario installare un unico nuovo tastatore O4TT sul Tracer Tower al posto di U102TT e U103TT. Le istruzioni necessarie sono incluse nella confezione del morsetto opzionale R30 (D746897ZB).

● Triax Pro: tutti i sistemi serratura utilizzabili con il morsetto standard R29-01J-02J sono stati implementati.

● Triax-e.code e Triax 2: la memoria interna di queste duplicatrici è completa. Con questo aggiornamento, sono stati implementati tutti i sistemi serratura già disponibili nelle duplicatrici Quattrocode, Triax Quattro e Triax Pro. Sia questi sistemi che i nuovi che Silca svilupperà saranno inseriti **solo** nel Silca Key Programs e non a bordo macchina. Quindi per utilizzare i nuovi sistemi con le duplicatrici Triax-e.code e Triax 2 è necessario avere il Silca Key Programs.

SILCA TRIAX - QUATTROCODE PROGRAM

Data Update with 28 new series

SKP Vers. 21.2.x.xx

VORSICHT:

- Für die Fräsmaschinen Quattrocode und Triax-e.code wurde die **neue Spannbacke R30** entwickelt, die die abnehmbaren Backen von Triax Pro und Futura verwenden kann. Nur für die neuen von Silca entwickelten Schließsysteme mit neuen Backen muss die Spannbacke R30 verwendet werden. Alle existierenden Extras für Quattrocode und Triax-e.code werden nicht durch abnehmbare Backen für die Spannbacke R30 ersetzt.
- Für die Fräsmaschine Triax Quattro wurde die neue Spannbacke R30 entwickelt, die die abnehmbaren Backen von Triax Pro verwenden kann. Alle in Triax Pro verwendeten abnehmbaren Backen können auch mit der Spannbacke R30 auf der Maschine Triax Quattro verwendet werden.
- Zur Benutzung der Spannbacke R30 mit den Fräsmaschinen Triax-e.code, Triax 2 und Triax Quattro, muss ein einziger neuer Taster 04TT am Tracer Tower an Stelle der Taster U102TT und U103TT eingebaut werden. Die entsprechende Anleitung ist in der Packung der Extra-Spannbacke R30 (D746897ZB) enthalten.
- Triax Pro: Alle mit der Standard-Spannbacke R29-01J-02J verwendbaren Schließsysteme wurden implementiert.
- Triax-e.code und Triax 2: Der maschineninterne Speicher dieser Fräsmaschinen ist komplett ausgeschöpft. Mit diesem Update wurden alle in den Fräsmaschinen Quattrocode, Triax Quattro und Triax Pro bereits schon verfügbaren Schließsysteme installiert. Sowohl diese Systeme als auch die neuen, die Silca entwickeln wird, werden **nur** in Silca Key Programm aufgenommen und nicht in die Maschine gespeichert. Für die Benutzung der neuen Systeme mit den Fräsmaschinen Triax-e.code und Triax 2 müssen Sie zwingend das Silca Key Programm haben.

ATTENTION:

- Pour les machines à reproduire les clés Quattrocode et Triax-e.code, on a introduit un **nouvel étai R30** qui peut accueillir les mâchoires amovibles de Triax Pro et Futura. L'étai R30 ne sera indispensable que sur les nouveaux systèmes. Pour les nouveaux systèmes serrure développés par Silca avec de nouvelles mâchoires, il faudra utiliser l'étai R30. Toutes les options existant pour Quattrocode et Triax-e.code ne seront par remplacées par des mâchoires amovibles pour l'étai R30.
- Pour la machine à reproduire les clés Triax Quattro on a introduit le nouvel étai R30 pouvant accueillir les mâchoires amovibles de Triax Pro. Tous les systèmes serrure développés sur Triax Pro sur les mâchoires amovibles sont utilisables avec l'étai R30 aussi sur la machine Triax Quattro.
- Pour utiliser l'étai R30 avec les machines à reproduire les clés Triax-e.code, Triax 2 et Triax Quattro, il faut installer un seul nouveau palpeur 04TT sur Tracer Tower au lieu des palpeurs U102TT et U103TT. Les instructions nécessaires sont incluses dans la boîte de l'étai optionnel R30 (D746897ZB).
- Triax Pro: tous les systèmes serrure utilisables avec l'étai standard R29-01J-02J ont été mis en oeuvre.
- Triax-e.code et Triax 2: la mémoire interne de ces machines à reproduire les clés est complète. Avec cette mise à jour, on a mis en oeuvre tous les systèmes serrure déjà disponibles pour les machines à reproduire les clés Quattrocode, Triax Quattro et Triax Pro. Ces systèmes, ainsi que les nouveaux systèmes que Silca développera, ne seront insérés **que dans** Silca Key Programs et non pas à bord de la machine, donc, pour exploiter les nouveaux systèmes avec les machines à reproduire les clés Triax-e.code et Triax 2 il faudra avoir Silca Key Programs.

ATENCIÓN:

- Para las duplicadoras Quattrocode y Triax-e.code se ha introducido la **nueva mordaza R30**, que puede alojar las quijadas amovibles de Triax Pro y Futura. Solamente para los nuevos sistemas de cerradura, desarrollados por Silca con nuevas quijadas, habrá que usar la mordaza R30. Todos los opcionales, existentes para Quattrocode y Triax-e.code, no pueden sustituirse por quijadas amovibles para la mordaza R30.
- Para la duplicadora Triax Quattro se ha introducido la nueva mordaza R30, que puede alojar las quijadas amovibles de Triax Pro. Todos los sistemas de cerradura, desarrollados en Triax Pro en las quijadas amovibles, se usan también con la mordaza R30 en la máquina Triax Quattro.
- Para usar la mordaza R30 con las duplicadoras Triax-e.code, Triax 2 y Triax Quattro, se ha de instalar un único nuevo palpador 04TT en el Tracer Tower en lugar de los U102TT y U103TT. Las instrucciones necesarias están incluidas en la caja de la mordaza opcional R30 (D746897ZB).
- Triax Pro: todos los sistemas de cerradura, que usar con la mordaza estándar R29-01J-02J, se han implementado.
- Triax-e.code y Triax 2: la memoria interna de estas duplicadoras está completa. Con esta actualización, se han implementado todos los sistemas de cerradura disponibles anteriormente en las duplicadoras Quattrocode, Triax Quattro y Triax Pro. Estos sistemas y los nuevos, que Silca desarrollará, se introducirán **solamente** en el Silca Key Programs y no a bordo de la máquina. Por consiguiente, para usar los nuevos sistemas con las duplicadoras Triax-e.code y Triax 2 se ha de poseer el Silca Key Programs.

ATENÇÃO:

- Para as máquinas duplicadoras Quattrocode e Triax-e.code foi introduzido o **novo mordente R30** que pode alojar as garras amovíveis de Triax Pro e Futura. Só para os novos sistemas fechadura desenvolvidos pela Silca com novas garras será necessário utilizar o mordente R30. Todos os opcionais existentes para Quattrocode e Triax-e.code não serão substituídos por garras amovíveis para o mordente R30.
- Para a máquina duplicadora Triax Quattro foi introduzido o novo mordente R30 que pode alojar as garras amovíveis de Triax Pro. Todos os sistemas fechadura desenvolvidos em Triax Pro nas garras amovíveis também podem ser utilizados com o mordente R30 na máquina Triax Quattro.
- Para utilizar o mordente R30 com as máquinas duplicadoras Triax-e.-code, Triax 2 e Triax Quattro, é necessário instalar um único novo palpador 04TT no Tracer Tower em lugar dos U102TT e U103TT. As instruções necessárias estão contidas na embalagem do mordente opcional R30 (D746897ZB).
- Triax Pro: todos os sistemas fechadura utilizáveis com o mordente standard R29-01J-02J foram implementados.
- Triax-e.code e Triax 2: a memória interna destas máquinas duplicadoras é completa. Com esta actualização, foram implementados todos os sistemas fechadura já disponíveis nas máquinas duplicadoras Quattrocode, Triax Quattro e Triax Pro. Seja estes sistemas bem como os novos que a Silca irá desenvolver serão inseridos **somente** no Silca Key Programs e não a bordo máquina. Portanto, para utilizar os novos sistemas com as máquinas duplicadoras ax-e.code e Triax 2 é necessário ter o Silca Key Programs.
